Summary

Computer Science graduate (Cybersecurity & Digital Forensics) and freelance developer who ships software end to end: a Microsoft Store desktop app (637 installs), a SaaS VPN (150+ active users), and custom apps for local businesses. Skilled in Python, JavaScript/Node.js, REST APIs, Docker, Linux, and AWS, with hands-on network security training.

Education

Vellore Institute of Technology — Bhopal, Madhya Pradesh

B.Tech in Computer Science & Engineering (Cybersecurity and Digital Forensics) — *Jun 2021 – Jul 2025*

- **CGPA:** 8.44 / 10
- **Relevant Coursework:** Data Structures & Algorithms, Operating Systems, Database Management Systems, Computer Networks, Cryptography, Network Security, Digital Forensics

Experience

Freelance Software Developer — 2025 – Present

Self-Employed — *Varanasi, Uttar Pradesh*

- Help local businesses in Varanasi grow and get online by building custom applications tailored to their needs.
- Designed, developed, and delivered multiple applications for local business clients, working directly with owners.

Projects

iLive Wallpaper | *Electron.js, Node.js, JavaScript, C++ (Native Addon), Windows API* — Aug 2024 – Present

- Built and published a Windows desktop app (Microsoft Store | Website) that turns static backgrounds into dynamic, interactive live wallpapers.
- Engineered a native C++ addon using the Windows API to overlay an animated canvas and forward mouse input to the underlying desktop, keeping the desktop fully usable.
- Reached 637 installs from 5.1K Store page views in 3 months (12.48% conversion; 98.45% install success rate).

Tony Tunnel VPN | *Python, Flask, SQLite, Docker, AWS EC2, Razorpay* — Feb 2023 – May 2024

- Launched a SaaS VPN service on the IKEv2 protocol, giving 150+ active users secure, low-latency access on restricted institutional networks.
- Deployed a containerized Flask backend (Docker, SQLite) on AWS EC2 and integrated Razorpay for secure payment handling.

Technical Skills

Languages: Python, JavaScript, C/C++, SQL, HTML/CSS
Frameworks & Libraries: Node.js, Express.js, React, Electron.js, Flask, FastAPI, Material-UI, WordPress
Backend & Databases: REST APIs, SQLite, MongoDB (NoSQL)
Cloud & DevOps: AWS (EC2), Google Cloud Platform (GCP), Docker, Linux, CI/CD, Git, GitHub
Security: Nmap, Wireshark, Burp Suite, Vulnerability Assessment, Threat Modeling, Incident Response
Networking: VPN (IKEv2), Firewalls, IDS/IPS

Certifications

Certified Network Security Practitioner (CNSP) — Nov 2023

The SecOps Group | Threat modeling, vulnerability assessment, incident response

Google Cloud Digital Leader — Nov 2023

Google | Core Google Cloud products: compute, storage, networking, databases, AI/ML, security

Google Cloud Computing Foundations — Dec 2023

Google | App Engine, Compute Engine, Cloud Functions, Kubernetes, IAM, monitoring, auto-scaling

Blockchain and its Applications — Apr 2024

NPTEL, IIT Kharagpur | Cryptography, decentralized ledgers, consensus algorithms
